CONNECTION

HYDRAULIC TANK

40 L. TANK

DEFOLIATOR model **DFR470**

Machine operated by hydraulic power supply, equipped with a series of conical rollers that remove the leaves with the aid of a suction fan. Our defoliator presents the possibility of mounting a front pre-cut blade, for a better trimming of vegetation.

ADVANTAGES

Our defoliator allows the elimination of basal leaves, improving the microclimate in the grapes area, increasing their exposure to the light and promoting air circulation. Working time is reduced by 70% and, near and near the grape harvest, it facilitates harvesting operations.

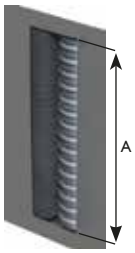

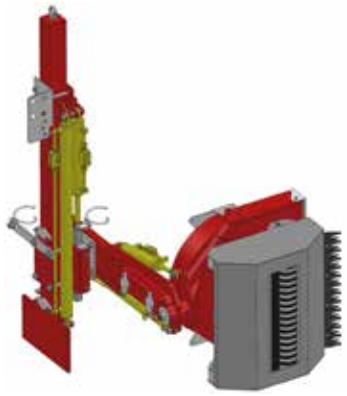

+ Robustsness and ease of use
