MECHANICAL THINNING MACHINE  
FOR ORCHARDS

model  
**TH500A/B/E**

[bmv-italy.com](http://bmv-italy.com)

Sharp Innovators

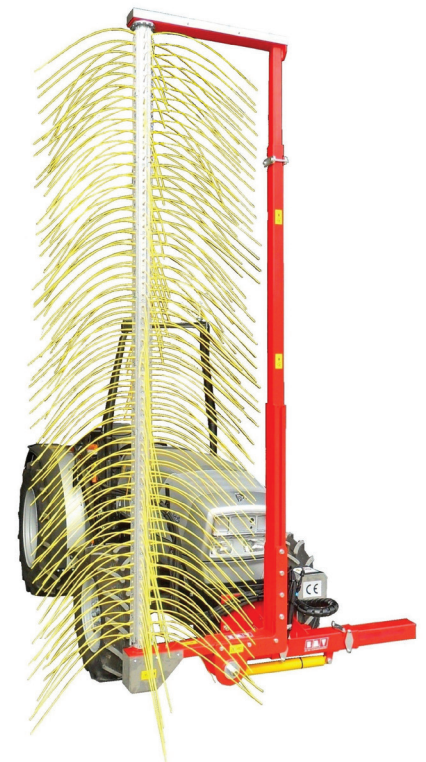

Our thinning machines are operating machines applied in front of tractor, equipped with hydraulic movements, to be adapted to any type of row. They consist of 1 or 2 working axles equipped with flexible and strong rubber flasks that allows to detach the weakest flowers without damaging those that remains on the branches.

## ADVANTAGES

The mechanical thinning can be done on any kind of orchard and it allows to obtain bigger fruits, qualitatively better, without using chemicals. Costs and working time are considerably reduced, always ensuring excellent efficiency.

model **TH500E**

# MECHANICAL THINNING model TH500A/B/E

## INDEPENDENT **HYDRAULIC TANKS** and **ACCESSORIES**

**40 LT.  
FIXED TANK**

**80 LT.  
TANK**

**JOYSTICK  
AND CONTROL BOX**

**CONSOLE WITH  
GRAPHIC DISPLAY**
