CONNECTION

FIXED CONNECTION

3-POINT CONNECTION

TANK

40 L. TANK

# PRUNER model **PR3000**

Used for winter pruning and clearing of vineyards, prepruning machines eliminate much of the seasonal vegetation, now woody, which is located above the fruit cord, between the support wires of the row.

## ADVANTAGES

Our prepruning machines allow a final saving of about 50-60% on labor.
The machine is attached to the front of the tractor and is operated by hydraulic power supply.

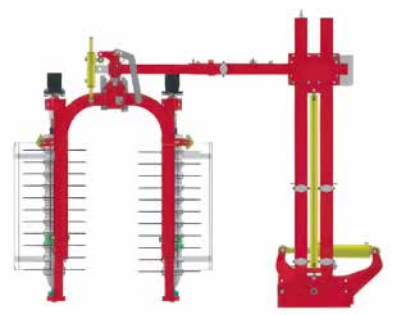

+

Low-arch version for pruning in vineyards "Guyot" type
