bmv-italy.com

Sharp Innovators

The BMV thinner is equipped with a shaft rotated by a hydraulic motor, with controlled rotation speed and effort.

Multiple swinging rods are mounted on this shaft.

It is the only machine for mechanical fruit thinning with motorized drive of the swing rods, present on the market.

ADVANTAGES

Reduction of labour costs.
Reduced environmental impact compared to chemical thinning.

THINNING MACHINE model THF800

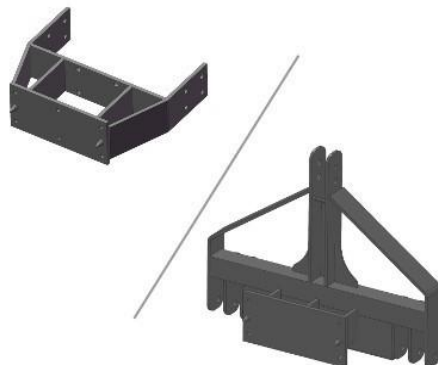

JOYSTICK CONSOLE

With a graphic display to view and adjust the number of turns of the swing shaft and
